## PMP CERTIFICATION

Learning objectives, Assessments, Instructional activities and Case studies.

# Project Management Professionals

The Project Management Professional (PMP) Certification is a globally recognized credential that equips individuals and organizations with project management knowledge and skills to enhance their effectiveness. The certification exam preparation training is centered on the 5 Process Groups and 10 Knowledge Areas of PMBOK® 6th Edition, as well as other project management practices necessary to pass the PMP® certification exam and improve on-the-job skills. This certification serves as proof of a project manager's knowledge, experience, and skills.
